

Offshore Firefighting Training

Realism, Expertise & Choice

Bringing OPITO-approved offshore emergency response team training within easy reach of County Durham and Teesside.

We are Transforming Emergency Response Training

Benefit from AIS Survivex's expertise as the UK's leading energy sector training provider, combined with the real-world firefighting skills of Vital Fire Solutions (VFS) - part of County Durham and Darlington's Fire and Rescue Service.

Our custom-built offshore emergency fire training facility is located at County Durham and Darlington's Fire and Rescue training centre at Bowburn. It incorporates a three-storey mock offshore platform rig with internal structures to mirror those on an offshore installation, and full size helideck simulator coming summer 2023.

Current industry standards dictate **at least 25% of the workforce** on an offshore installation are trained to respond to an emergency firefighting scenario, making this skill highly desirable for both the offshore workforce and employers.

Key benefits:

- ✓ Conveniently located for Teesside and County Durham
- ✓ Realistic training - prepare your teams to act in an emergency scenario
- ✓ Highly skilled and experienced team of instructors
- ✓ Safe and controlled environment

Training delivered:

- ✓ **OPITO Offshore Emergency Response Team Member (OERTM)**
- ✓ **OPITO Offshore Emergency Response Team Leader (OERTL)**

Our Services

In-Centre

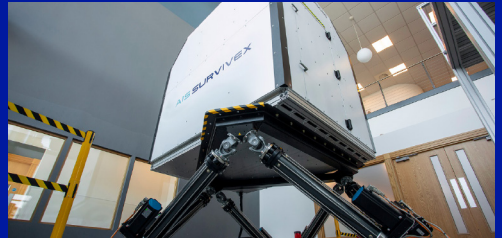

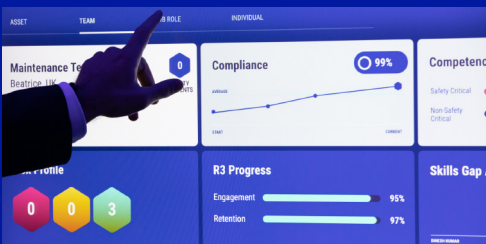

Training Centres of Excellence

We operate a huge range of courses at our OPITO, GWO, ECITB and STCW-accredited training centres conveniently located in the North East of England and Scotland.

Onboard & Onsite

Let us do the leg work

Reduce costs, travel and training days by having our qualified instructor/assessors train at your premises or onboard your vessel. Improve safety culture by training in a familiar environment.

Training Management

Transforming training with technology

Consolidate your training suppliers into a single relationship. Our technology-lead Training Management Services (TMS) leave your internal teams to focus on what you do best.

Simulation & VR

Fixed, portable and VR training solutions

Following recent investments of over £1m, we have a full suite of simulator-based training as well as Virtual Reality and portable, desktop training technology solutions. Ask us for a demo!

The UK's biggest energy sector training provider.
